EDRS PRICE	Document Not Available from EDRS.
DESCRIPTORS	*Demonstrations (Science); Early Childhood Education; Elementary Education; *Gravity (Physics); *Hands on Science; *Physical Sciences; Science Activities; Science Instruction; Videotape Recordings

ABSTRACT

Up, up and away! A hot air balloon, an airplane and even the space shuttle all defy the force of gravity, but they all do it in different ways. Children will learn about the basic concepts that make flight possible. With clear demonstrations and a hands-on project, students will be able to understand more easily the basic concepts behind various types of flight. One of the 11 volumes in the Physical Science for Children series in the Schlessinger Science Library. Part of the Schlessinger Science Library for Children Collection. This title correlates to the National Science Education Standards for Physical Science--properties of objects and materials, position and motion of objects, and light, heat, electricity and magnetism. This program includes a teacher's guide. (MM)
